Dwelling Houses, Their Sanitary Construction and Arrangements

Corfield William Henry
DWELLING HOUSES
DWELLING HOUSES

THEIR

SANITARY CONSTRUCTION AND ARRANGEMENTS

BY

W. H. CORFIELD, M.A., M.D. OXON., F.R.C.P. LOND.

Professor of Hygiene and Public Health in University College, London;
Medical Officer of Health for St. George's, Hanover Square;
Past President of the Society of Medical Officers of Health;
Vice-President of the Sanitary Institute;
"Membre d'Honneur" of the Royal Society of Public Health of Belgium;
Honorary Member of the Society of Hygiene of France, and of the Hungarian Society of Public Health;
Honorary Corresponding Member of the Imperial Society of Medicine of Constantinople and of the Royal Society of Hygiene of Italy;
Fellow of the Medical Society of Sweden.

FOURTH EDITION, WITH ILLUSTRATIONS

LONDON
H. K. LEWIS, 136 GOWER STREET, W.C.
1898
PREFACE.

The following chapters were delivered as a Course of Cantor Lectures before the Society of Arts. The lectures were largely illustrated by specimens borrowed from the Parkes Museum of Hygiene, at University College, and many of the illustrations are selected from those in the catalogue of that museum, others being chosen from those in "Our Homes," with the kind permission of Messrs. Cassell and Co.

The work has been carefully revised throughout, and a number of special illustrations added.

My thanks are due to Dr. H. R. Kenwood for kindly preparing the Index.

It is hoped that the book may be useful as a short and practical exposition of the means by which dwelling houses may be made wholesome.

This, the Fourth Edition, has been again carefully revised throughout by the Author.

W. H. C.

CONTENTS.

CHAPTER II.

VENTILATION, LIGHTING, AND WARMING.

Effects of Respiration ........................................... 15
Limit of Respiratory Impurity—Quantity of Air required—
   Cubic Space .................................................. 16
Overcrowding—Ventilation—Winds ................................ 17
Silvester's Plan—Action of Chimneys ............................. 18
Ventilation by Windows ........................................... 19
Apertures for Admission of Pure Air .............................. 20
Dr. Hinckes Bird's Plan .......................................... 21
Direction in which Air ought to be admitted—Filtering Boxes 22
Currall's Ventilator—Sash Fasteners—Venetian Blinds ....... 23
Louvres—of glass, of wood—Swinging Sashes .................. 24
Double Windows—Casement Windows—Cooper's Ventilator ...... 25
Openings in Walls or Doors—Sherringham Valve ............... 26-27
Stevens's Drawer Ventilator ..................................... 27-28
Jennings's "Inlet"—Perforated Zinc ............................... 28
Iron Grating—Currall's Door Ventilator ......................... 28
Vertical Tubes—Water Tray ...................................... 30
Filtering bags—Ellison's Conical Ventilators—Pritchett's  
Paving ........................................................................ 31
Exit Shafts and Valves—Cows .................................... 32
Fixed Cows—Revolving Cows ..................................... 33
Arnott's Valve ....................................................... 34
Boyle's Exit Ventilator—Air Flues ................................. 35
Mackinnell's Ventilator—Railway Lamps ......................... 35
Candles and Lamps—Gas Burners—Escape for Products of  
   Combustion ....................................................... 37
Benham's Globe Light .............................................. 38
Sun-Light Ventilators—Benham's Globe Light—Electric Light 39
Galton's Grate—Manchester School Grate ....................... 40
