A Handbook of Obstetrical Nursing for Nurses, Students, and Mothers

Fullerton Anna Martha
BY THE SAME AUTHOR.

NURSING IN

ABDOMINAL SURGERY

AND

DISEASES OF WOMEN.

A Series of Lectures Delivered to the Pupils of the Training School
for Nurses Connected with the Woman's Hospital of
Philadelphia, comprising their Regular Course
of Instruction on such Topics.

BY ANNA M. FULLERTON, M.D.,
Physician-in-Charge of and Obstetrician and Gynecologist to the Woman's
Hospital of Philadelphia, etc.

19mo. 284 Pages. 70 Illustrations. Cloth, $1.50.

* * * The immediate success of Dr. Fullerton's "Handbook of
Obstetrical Nursing," a second edition of which has just been pub-
lished, has encouraged her to prepare this manual on another and
very important branch of the science and art of nursing. Dr.
Fullerton has demonstrated that she not only knows what to say,
but that she has the happy faculty of saying it in a plain, practical
style that interests as well as instructs.

SYNOPSIS OF CONTENTS.—The Surgical Nurse—The Germ Theory
of Disease—Asepsis and Antiseptics—Abdominal Section—The Pre-
paration of the Room—The Preparation of Sponges—Sterilization
of Instruments, etc.—Preparation of the Patient—Preparation of

of Pennsylvania,

Attending Obstetrician and Gynecologist,

and former Physician-in-Charge,

of the

Woman's Hospital of Philadelphia,

This Volume

Is affectionately dedicated.
PREFACE TO SECOND EDITION.

In this second edition of my book, the main revisions have been made in the chapter on the care of the new-born infant, in which I have endeavored to bring the subject up to the present standard of our knowledge. I would acknowledge in this connection the valuable aid afforded me by the articles of Dr. T. M. Rotch on the subject and the analytical work of Dr. H. Leffmann. I trust that these additions may serve to make life healthier and happier for infancy.

ANNA M. FULLERTON.

August, 1891.
