Principles and practical methods of curing tobacco

Garner W W
Title: Principles and practical methods of curing tobacco

Author: Garner W W

This is an exact replica of a book. The book reprint was manually improved by a team of professionals, as opposed to automatic/OCR processes used by some companies. However, the book may still have imperfections such as missing pages, poor pictures, errant marks, etc. that were a part of the original text. We appreciate your understanding of the imperfections which can not be improved, and hope you will enjoy reading this book.
PRINCIPLES AND PRACTICAL METHODS
OF CURING TOBACCO.

BY

W. W. GARNER,
Physiologist, Tobacco Investigations.

ISSUED February 16, 1909.
BUREAU OF PLANT INDUSTRY.

Physiologist and Pathologist, and Chief of Bureau, Beverly T. Galloway.
Physiologist and Pathologist, and Assistant Chief of Bureau, Albert F. Woods.
Laboratory of Plant Pathology, Erwin F. Smith, Pathologist in Charge.
Fruit Disease Investigations, Merton B. Waite, Pathologist in Charge.
Laboratory of Forest Pathology, Haven Metcalf, Pathologist in Charge.
Cotton and Truck Disease and Plant Disease Survey, William A. Orton, Pathologist in Charge.
Pathological Collections and Inspection Work, Flora W. Patterson, Mycologist in Charge.
Cotton Breeding Investigations, Archibald D. Shamel and Daniel N. Shoemaker, Physiologists in Charge.
Corn Investigations, Charles P. Hartley, Physiologist in Charge.
Alkali and Drought Resistant Plant Breeding Investigations, Thomas H. Kearney, Physiologist in Charge.
Soil Bacteriology and Water Purification Investigations, Karl F. Kellerman, Physiologist in Charge.
Botanical Investigations of Tropical and Subtropical Plants, Ortivar F. Cook, Botanist in Charge.
Physical Laboratory, Lyman J. Bridges, Physicist in Charge.
Agricultural Technology, Nathan A. Cobb, Crop Technologist in Charge.
Taxonomic and Range Investigations, Frederick V. Coville, Botanist in Charge.
Farm Management, William J. Spillman, Agriculturist in Charge.
Grain Investigations, Mark Alfred Carleton, Cerealist in Charge.
Arlington Experimental Farm and Horticultural Investigations, Lee C. Corlett, Horticulturist in Charge.
Vegetable Testing Gardens, William W. Tracy, Sr., Superintendent.
Sugar-Beet Investigations, Charles O. Townesend, Pathologist in Charge.
Western Agricultural Extension, Carl S. Sechfield, Agriculturist in Charge.
Dry-Land Agriculture Investigations, E. Channing Chilcote, Agriculturist in Charge.
Pomological Collections, Gustavus B. Brackett, Pomologist in Charge.
Experimental Gardens and Grounds, Edward M. Byrnes, Superintendent.
Foreign Seed and Plant Introduction, David Fairchild, Agricultural Explorer in Charge.
Forage Crop Investigations, Charles V. Piper, Agrostologist in Charge.
Seed Laboratory, Edgar Brown, Botanist in Charge.
Grain Standardization, John D. Shankman, Crop Technologist in Charge.
Subtropical Gardens, Merrill, Ph., P. J. Wester, in Charge.
Plant Introduction Garden, Chico, Cal., W. W. Tracy, Jr., Assistant Botanist in Charge.
South Texas Garden, Brownsville, Tex., Edward C. Green, Pomologist in Charge.
Farmers' Cooperative Demonstration Work, Sumner A. Knapp, Special Agent in Charge.
Seed Distribution (directed by Chief of Bureau), Lisle Morrison, Assistant in General Charge.

Editor, J. E. Rockwell.
Chief Clerk, James E. Jones.

TOBACCO INVESTIGATIONS.

SCIENTIFIC STAFF.

A. D. Shamel, Physiologist; W. W. Garner, Physiologist; and E. H. Mathewson, Crop Technician, jointly in charge.

W. M. Hinson, W. W. Green, and G. W. Harris, Crop Technologists.
J. B. Stewart and Otto Olson, Tobacco Experts.
J. B. Norton, Physiologist.
C. L. Foubert, Chemist Aid.
B. G. Anderson, Collaborator.

143
LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
BUREAU OF PLANT INDUSTRY,
OFFICE OF THE CHIEF,
WASHINGTON, D. C., OCTOBER 28, 1908.

SIR: I have the honor to transmit herewith a manuscript entitled "Principles and Practical Methods of Curing Tobacco," and recommend that it be published as a bulletin of the series of this Bureau.

The proper management of the curing barn requires some knowledge of the physiological changes which are taking place in the curing process. There is a rapidly increasing demand for such information. For this reason the bulletin has been divided into two parts, one discussing the principles of curing and the second the practical methods of curing based on the principles discussed in the first part.

Respectfully,

B. T. GALLOWAY,
Chief of Bureau.

HON. JAMES WILSON,
Secretary of Agriculture.
CONTENTS.

PART I.—PRINCIPLES OF CURING TOBACCO.

Introduction ................................................................. 7
Changes in the composition and properties of the leaf which take place in the curing process ................................. 8
The ripening of tobacco .................................................. 9
Curing the picked leaves compared with curing on the stalk ................. 10
The air-curing process .................................................. 12
First stage of air-curing .............................................. 13
Second stage of air-curing .............................................. 14
The most favorable conditions for air-curing ......................... 15
Pole-sweat, or house-burn ............................................ 17
Air-curing as affected by heat and ventilation ...................... 18
Available methods of applying artificial heat ..................... 20
Modifications of the air-curing process ................................ 21
The flue-curing process .............................................. 22
Changes in the composition and properties of the leaf ............... 22
Conditions affecting the rate of cure ................................ 23
Management of flue-curing ............................................ 24
Curing tobacco with open fires ...................................... 25

PART II.—PRACTICAL METHODS OF CURING AS APPLIED TO THE VARIOUS TYPES OF TOBACCO.

Cigar tobaccos ............................................................ 27
Construction of the barn for curing cigar tobaccos .................. 27
Harvesting cigar tobacco ............................................. 30
Curing cigar tobacco .................................................. 33
Stripping and assorting cigar tobacco ................................ 35
Shade-grown cigar-wraper leaf ....................................... 36
Management of the curing barn ...................................... 38
Barley tobacco ............................................................ 39
Harvesting Barley tobacco ............................................ 40
Curing Barley tobacco ............................................... 40
Assorting and packing Barley tobacco ............................... 40
Sun-cured tobacco ...................................................... 41
Yellow tobacco .......................................................... 41
Construction of the barn for curing yellow tobacco ............... 41
Harvesting yellow tobacco ......................................... 44
Curing yellow tobacco ............................................... 45
Handling yellow tobacco after curing ............................... 46
Heavy export tobaccos ................................................ 47
Harvesting export tobacco .......................................... 48
Curing export tobacco .............................................. 48
Handling export tobacco ........................................... 49
Perique tobacco .......................................................... 50

Index ............................................................................. 53
ILLUSTRATIONS.

Fig. 1. Type of barn used in northern cigar-tobacco districts, showing the arrangement of horizontal ventilators ........................................ 29
2. Type of barn used in southern cigar-tobacco districts, showing the arrangement of ventilators ............................................. 30
3. Tobacco field, showing the method employed in spearing plants on a lath, with the hurdle used for supporting the latter during the operation .............................................. 32
4. The best form of wagon rack for hauling plants to the curing barn ... 32
5. A very convenient wagon rack for hauling baskets of picked leaves to the curing barn .......................................................... 37
6. The interior of a cigar-tobacco barn, showing the arrangement of tier poles and the method of hanging picked leaves .......................... 38
7. Type of tobacco barn used in the Barley district of Kentucky ........ 39
8. A typical log barn used in curing yellow tobacco, showing the ventilator in the gable and the outside portions of the heating system ... 42
9. Sketch showing the arrangement of furnaces and flues in a barn adapted for curing yellow tobacco ........................................ 43
10. Stick with wires used in the yellow-tobacco districts for hanging picked leaves in the curing barn ........................................... 45
