ENQUIRY INTO PLANTS

AND MINOR WORKS ON ODOURS AND WEATHER SIGNS

WITH AN ENGLISH TRANSLATION BY

SIR ARTHUR HORT, BART., M.A.

FORMERLY FELLOW OF TRINITY COLLEGE, CAMBRIDGE

IN TWO VOLUMES

II

LONDON: WILLIAM HEINEMANN

NEW YORK: G. P. PUTNAM'S SONS

MCMXVI
CONTENTS

BOOK VI

OF UNDER-SHRUBS

Of the classification of under-shrubs: the wild kinds: the chief distinction that between spinous and spineless ........................................... 3
Of spineless under-shrubs and their differences ............ 7
Of certain specially important spineless under-shrubs—silphium and magydaris—belonging to ferula-like plants ........................................................................... 15
Of spinous under-shrubs and their differences ............ 21
Of cultivated under-shrubs (coronary plants), with which are included those coronary plants which are herbaceous ....................................................................... 35
Of the seasons at which coronary plants flower, and of the length of their life .......................................................... 49

BOOK VII

OF HERBACEOUS PLANTS, OTHER THAN CORONARY PLANTS:
POT-HERBS AND SIMILAR WILD HERBS

Of the times of sowing and of germination of pot-herbs 59
Of the propagation of pot-herbs, and of differences in their roots .......................................................... 67
Of the flowers and fruits of pot-herbs ......................... 75
Of the various forms of some pot-herbs .................... 81
Of the cultivation of pot-herbs; manure and water ........ 93
Of the pests which infest pot-herbs ........................... 95
Of the time for which seed of pot-herbs can be kept .... 97
Of uncultivated herbs: the wild forms of pot-herbs ... 99
CONTENTS

Of other uncultivated herbs, which may be classed with pot-herbs ........................................... 103
Of the differences in stem and leaf found in all herbaceous plants .............................................. 107
Of other differences seen in herbaceous plants in general, as compared with one another and with trees 111
Of the seasons at which herbs grow and flower ................................................................. 115
Of the classes into which herbaceous plants may be divided, as those having a spike and chicory-like plants ................................................................. 119
Of herbs which have fleshy or bulbous roots ........................................................................... 125
Of certain properties and habits peculiar to certain herbaceous plants ...................................... 135

BOOK VIII

OF HERBACEOUS PLANTS: CEREALS, PULSES, AND ‘SUMMER CROPS’

Of the three classes and the times of sowing and of germination ................................................. 143
Of differences in the mode of germination and of subsequent development .......................... 149
Of differences in development due to soil or climate ................................................................. 155
Of differences between the parts of cereals, pulses, and summer crops respectively .................. 159
Of the differences between cereals ............................................................................................. 165
Of the differences between pulses ............................................................................................... 173
Of sowing, manuring, and watering ............................................................................................. 177
Of the degeneration of cereals into darnel ................................................................................. 183
Of the peculiar character of chick-pea ......................................................................................... 183
Of special features of ‘summer crops’ ......................................................................................... 185
Of treatment of cereals peculiar to special localities ................................................................. 185
Of cereals which grow a second time from the same stock ....................................................... 187
Of the effects of climate, soil, and manuring ............................................................................. 189
Of different qualities of seed ........................................................................................................ 191
CONTENTS

Of degeneration of cereals, and of the weeds which infest particular crops ........................................ 193
Of the conditions in the seeds of pulses known as 'cookable' and 'uncookable,' and their causes .......... 197
Of the grains and pulses which most exhaust the soil, or which improve it ........................................ 199
Of the diseases of cereals and pulses, and of hurtful winds ............................................................. 201
Of seeds which keep or do not keep well ................................................................................................. 205
Of the age at which seeds should be sown ......................................................................................... 209
Of artificial means of preserving seed ................................................................................................. 211
Of the effect of heat on seeds .............................................................................................................. 211
Of certain peculiarities of the seed of lupin and aigilops ................................................................. 213

BOOK IX

OF THE JUICES OF PLANTS, AND OF THE MEDICINAL PROPERTIES OF HERBS

Of the various kinds of plant-juices and the methods of collecting them .............................................. 217
Of resinous trees and the methods of collecting resin and pitch ......................................................... 223
Of the making of pitch in Macedonia and in Syria ............................................................................ 229
Of frankincense and myrrh: various accounts ..................................................................................... 233
Of cinnamon and cassia: various accounts .......................................................................................... 243
Of balsam of Mecca ............................................................................................................................ 245
Of other aromatic plants—all oriental, except the iris ..................................................................... 247
Of the medicinal juices of plants and the collection of them: general account ................................. 251
Of the cutting of roots for medicinal purposes, and of certain superstitions connected therewith .... 255
Of the medicinal uses of divers parts of plants .................................................................................... 261
Of hellebores, the white and the black: their uses and distribution .................................................. 265
Of the various kinds of all-heal ............................................................................................................ 269
Of the various plants called strychnos ............................................................................................... 271
Of the various kinds of tithymallos ...................................................................................................... 275
CONTENTS

Of the two herbs called libanotis .................................................. 277
Of the two kinds of chamaeleon ...................................................... 277
Of the various plants called 'poppy' ............................................. 279
Of roots possessing remarkable taste or smell .......................... 281
Of the time for which roots can be kept without losing their virtue . 287
Of the localities which specially produce medicinal herbs ........ 289
Of the medicinal herbs peculiar to Crete ..................................... 295
Of wolf's-bane and its habitat, and of meadow-saffron .............. 299
Of two famous druggists and of the virtues of hemlock .................. 303
How use diminishes the efficacy of drugs, and how they have not the same effect on all constitutions . 305
Of plants that possess properties affecting lifeless objects ........ 309
Of plants whose properties affect animals other than man ........... 309
Of plants possessing properties which affect the mental powers .... 311
Of plants said to have magical properties ................................. 313
A problem as to cause and effect ............................................... 313
Of certain plants, not yet mentioned, which possess special properties .................................................. 315

MINOR WORKS

INTRODUCTION TO THE TREATISES CONCERNING ODOURS
AND CONCERNING WEATHER SIGNS ........................................... 324

CONCERNING ODOURS

Introductory: Of odours in general and the classification of them .................................................. 327
Of natural odours; of those of animals and of the effect of odours on animals .................................. 329
