Admission Sixpence; Evenings, One Shilling.

Promenade Concerts Twice Daily, at Four and Eight.

STAND No. 20.

# BOYLE'S

Patent Self-acting

## Air-pump Ventilators

Effectually extract the foul air, have no mechanical motion, are entirely free from down-draught, and can be constructed to harmonise with every style of architecture.

"They are constructed on sound scientific principles, act in strict accordance with the laws of Nature, and cannot fail to operate."—Professor GRANT, LL.D., Glasgow Observatory.

### EFFICIENT VENTILATION GUARANTEED

These Ventilators are pronounced by the most eminent scientific and practical men in the kingdom to be the most efficient method of Ventilation yet brought out.

### TESTIMONIALS.

DR. B. W. RICHARDSON, F.R.S.—"Since these excellent Ventilators have been introduced we have now got perfect methods of ventilation."

From the late Sir GILBERT SCOTT, Architect.—"I have used your Patent Self-Acting Air-Pump Ventilators with complete success. From experience of them in my own house and other buildings—public and private—where they have been applied under my direction, I can confidently and will always have great pleasure in recommending them."

From ARTHUR CATES, Esq., F.R.I.B.A., Architect to the Crown, &c.—"I have used your Air-Pump Ventilator with satisfactory result. Those fixed under my direction at the Library of the Inner Temple have realised my expectations, and completely fulfil the object which I had in view. I consider this application of them a severe test, and the success which has attended it confirms the statement which you make as to their efficacy."

From Sir WILLIAM THOMPSON, F.R.S., Glasgow University.—"I have seen several different forms of Mr. Boyle's Air-Pump Ventilator in actual operation, and have much pleasure in testifying to their efficiency. They thoroughly realise the favourable anticipations which I had formed from experiments on models shown to me by Mr. Boyle. Having one fitted up in my yacht, I find it has caused a very decided improvement in the draught."

## Boyle's System of Sanitation.

SOIL PIPES, DRAINS, and SEWERS VENTILATED on the most approved principles by means of BOYLES' PATENT SELF-ACTING AIR-PUMP VENTILATORS, combined with an Improved Trap and Inlet for fresh air.

Soil Pipe Ventilators, made of Strong Galvanized Iron and painted with Enamel Paint—

6 inch diameter, 2 inch Pipe	-	-	£1 0 0	10 inch diameter, 3 1/4 to 4 inch Pipe	-	£1 12 6
8 " " " "	-	-	£1 5 0	12 " " " "	-	£2 0 0

"I have often made use of the Air-Pump Ventilator, for soil-pipes, &c., and consider it most admirable. Its action is continuous, and it cannot possibly get out of order. It is decidedly the most efficient fixed foul air withdrawing medium that I have ever met with."—W. EASSIE, Esq., C.E., F.L.S., &c., London, Author of "Healthy Houses," &c.

"Boyle's Patent Self-Acting Air-Pump Ventilator, which does not revolve, is the best soil-pipe Ventilator that I know of."—ERNEST TURNER, Esq., F.R.I.B.A., &c.

Estimates given and Designs supplied.

PROSPECTUSES, PRICE LISTS, AND TESTIMONIALS ON APPLICATION.

## ROBERT BOYLE & SON, Ventilating & Sanitary Engineers,

64, HOLBORN VIADUCT, LONDON, & 110, BOTHWELL STREET, GLASGOW.

N.B.—The complete system may be seen in operation and tested at the above offices. Inspection respectfully invited.

ION.—Beware of spurious and worthless imitations of the Air-Pump Ventilator, which unprincipled persons are at present attempting to palm off upon the public.

FASTBOURNE

# SANITARY EXHIBITION.

MESSRS. PACKHAM & CO.

Will be in attendance with samples of their Non-alcoholic Beverage,

# HEDOZONE.

Professional Gentlemen are specially invited to taste  
this pure and elegant preparation.

*Hedozone was first successfully produced in 1876. No similar article imitating it can be compared with Hedozone in all those qualities which constitute its special value as a Tonic Beverage and Food Drink for Daily Use.*

*Before Vice-Chancellor Sir R. Malins.*

## ZOEDONE v. HEDOZONE.

The Zoedone Company have submitted to pay all costs, charges, and expenses of the above action, and have thereby admitted in fact that Hedozone is not, as was alleged by them, an imitation of Zoedone either in name or mode of preparation.

The evidence in the cause would have conclusively proved that not only is HEDOZONE the earlier invention, but that by the use of DISTILLED WATER and other originalities in manufacture, it is different from, and is in fact SUPERIOR to Zoedone as a NON-ALCOHOLIC STIMULANT.

*The Official Number of the Hedozone Trade Mark is 22,493.*

*The Official Number of the Zoedone Trade Mark is 22,579.*
