Preface

There are other battles than those fought with steel and lead, where generalship is needed, and courage likewise. It is concerning one of these, now going on, that this book is written. With only a thin veil of disguise thrown over the actual workers, who are still on the field, and only such fictitious elements introduced as are necessary to a story that has to do with native thought and character, the writer has, to the best of his ability, given a true picture of the campaign thus far, and the conditions, with some of its lights as well as its shadows. May the earnestness of the conflict come home to the reader.
