# **A Class Book of Modern Geography**

**Hughes William**

---

**Title: A Class Book of Modern Geography**

**Author: Hughes William**

**This is an exact replica of a book. The book reprint was manually improved by a team of professionals, as opposed to automatic/OCR processes used by some companies. However, the book may still have imperfections such as missing pages, poor pictures, errant marks, etc. that were a part of the original text. We appreciate your understanding of the imperfections which can not be improved, and hope you will enjoy reading this book.**

3 2044 102 874

The "Advanced Class-Book of Modern Geography" is also published

"Class-Book of Physical Geography," &c. &c.

\* \* \* This Atlas is designed to accompany Professor Hughes's  
"Class-Book of Modern Geography."

GEORGE PHILIP & SON, PUBLISHERS, LONDON AND LIVERPOOL.

## PREFACE.

—:0:—

THE following are some of the leading features of this popular School-book:—(1) *Its clear and scientific arrangement.* In this work there is no arbitrary division between Physical and Political Geography. The two are most intimately connected, and it is indisputable that the geography of any part of the earth may be best studied by combining them as much as possible, and carefully noticing the connection between them. The divisions of the subject-matter in the present work are throughout based on this principle. (2) *Its comprehensiveness and completeness.* Being designed for the use of the more advanced pupils and students, it was absolutely necessary that the work should be at once *comprehensive* and *complete*. Special care has therefore been taken to include not only the general facts of the science, but also every *essential* detail. (3) *Its thorough revision and extension.* An examination of the work will show that the information throughout is of the latest and most reliable character, and that much additional matter has been inserted. (4) *The valuable sets of Examination Questions* appended to each section, and designed for written or oral examinations. Teachers will doubtless regard these Questions as one of the most important features of the work. (5) *Its systematic arrangement of type*—thus affording material aid in its study. The more important facts are printed in large type—less important but still essential detail in smaller type—while further information, statistical, etymological, historical, and explanatory, is given in the footnotes. And, lastly, a complete *Index* of all the places described or mentioned in the book.
