Title: Proceedings of the United States National Museum, Volume 61

Author: #Smithsonian Institution, #United States National Museum, #United States. Dept. Of The Interior

This is an exact replica of a book. The book reprint was manually improved by a team of professionals, as opposed to automatic/OCR processes used by some companies. However, the book may still have imperfections such as missing pages, poor pictures, errant marks, etc. that were a part of the original text. We appreciate your understanding of the imperfections which can not be improved, and hope you will enjoy reading this book.
ADVERTISEMENT.

The scientific publications of the National Museum consist of two series—Proceedings and Bulletins.

The Proceedings, the first volume of which was issued in 1878, are intended primarily as a medium for the publication of original papers based on the collections of the National Museum, setting forth newly acquired facts in biology, anthropology, and geology derived therefrom, or containing descriptions of new forms and revisions of limited groups. A volume is issued annually or oftener for distribution to libraries and scientific establishments, and, in view of the importance of the more prominent disseminations of new facts, a limited edition of each paper is printed in pamphlet form in advance. The dates at which these separate papers are published are recorded in the table of contents of the volume.

The present volume is the sixty-first of this series.

The Bulletin, publication of which was begun in 1875, is a series of more elaborate papers, issued separately, and, like the Proceedings, based chiefly on the collections of the National Museum.

A quarto form of the Bulletin, known as the "Special Bulletin," has been adopted in a few instances in which a larger page was deemed indispensable.

Since 1902 the volumes of the series known as "Contributions from the National Herbarium," and containing papers relating to the botanical collections of the Museum, have been published as Bulletins.

WILLIAM DEC. RAVENEL,

Administrative Assistant to the Secretary,
in Charge of the United States National Museum.

January 10, 1923.

LIST OF ILLUSTRATIONS.

PLATES.

Some Upper Cretaceous Shells of the Rudistid Group from Tamaulipas, Mexico.

By L. W. Stephenson.

1–4. Tampsia bishopi Stephenson .......................................................... 14
5–8. Tampsia chocoyensis Stephenson ................................................... 14
9–10. Sauvagesia depolyerii Stanton? .................................................. 14
11. Sauvagesia belti Stephenson .......................................................... 14
12–14. Sauvagesia coloradensis Stephenson .......................................... 14
15. Durania manuelensis Stephenson .................................................... 14

A Revision of the Chalcid-Flies of the Encyrtid Genus Chrysoplatycerus.

By P. H. Timberlake.

1. Forewings of Chrysoplatycerus ferrisi Timberlake ............................. 10

The Smallest Known Horned Dinosaur Brachyceratops.

By Charles W. Gilmore.

1. Mounted skeleton of Brachyceratops montanensis, viewed from the left side ... 4
2. Mounted skeleton of Brachyceratops montanensis, viewed from the right side... 4
3. Mounted skeletons of Brachyceratops and Triceratops .......................... 4
4. Restoration of Brachyceratops montanensis ....................................... 4

On Meteoric Irons from Alpine, Brewster County, Texas, and Signal Mountain, Lower California, and a Pallasite from Cold Bay, Alaska.

By George P. Merrill.

1. Fig. 1. The Signal Mountain, Lower California, octahedrite, magnified 2\(\frac{1}{2}\) diameters; showing in the upper left secondary granulation... 4
2. The Alpine, Texas, ataxite. Polished surface magnified about 4 diameters ................................................................. 4

2. Fig. 1. The Cold Bay, Alaska, pallasite. Broken and polished surfaces. Enlarged about one-fourth ........................................... 4
2. The Cold Bay, Alaska. Polished surface. Enlarged 2\(\frac{1}{2}\) diameters... 4

Crinoids from the Upper Cretaceous of Tamaulipas, Mexico.

By Frank Springer.

1. A new crinoid from the Upper Cretaceous of Mexico .......................... 4
LIST OF ILLUSTRATIONS.

STUDIES ON CHALCID-FLIES OF THE SUBFAMILY LEUCOSPIDINAЕ, WITH DESCRIPTIONS OF NEW SPECIES.

By Clara Jamieson Weld.

1. Leucopsis affinis ........................................ 42
2. Heads and hind femora of Leucospidinae .......................... 42
3. Abdomens of Leucospidinae .................................. 42
4. Details of Leucospidinae ..................................... 42

A NEW GENUS OF TRENATODES FROM THE WHITE BASS.

By H. J. Van Cleave.

1. Allacanthochasmus varius, new species ............................ 8

NOTES ON WEST INDIAN MILLIPEDS.

By Ralph Chamberlin.

1–6. West Indian millipedes ..................................... 20

PARSEE RELIGIOUS CEREMONIAL OBJECTS IN THE UNITED STATES NATIONAL MUSEUM.

By I. M. Casanowicz.

1. Portrait of Zoroaster ........................................ 3
2. Fire ladle (left), fire urn (center), fire tongs (right) ........... 11
3. Offering tray ................................................ 12
4. Ceremony of investiture with the sudra and kusti ............... 13
5. Parsee gentleman, showing costume ................................ 14
6. Parsee mother and children, showing costumes ................. 15
7. Tower of silence ............................................. 16

A NEW CESTODE FROM THE MANEATER AND MACKEREL SHARKS.

By Edwin Linton.

1–3. A new cestode, Phyllobothrium tumidum .......................... 16

DESCRIPTION OF THE SKULL OF MEGAPTERA MIOCÆNA, A FOSSIL HUMPBACK WHALE FROM THE MIocene DIATOMACEOUS EARTH OF LOMPOC, CALIFORNIA.

By Remington Kellogg.

1. Ventral view of skull of Megaptera miocæna ....................... 18
2. Outline drawing of ventral view of skull of Megaptera miocæna 18
3. Dorsal view of skull of Megaptera miocæna ........................ 18
4. Lateral view of skull of Megaptera miocæna ....................... 18

A REVISION OF THE NORTH AMERICAN ICHEUMON-FLIES BELONGING TO THE SUBFAMILIES NEOEURINÆ AND MICROGASTERINÆ.

By C. F. W. Muesebeck.

1. North American ichneumon-flies .................................. 74

NEW PEARLY FRESH WATER MUSSELS FROM SOUTH AMERICA.

1–3. South American fresh-water mussels ............................ 10
LIST OF ILLUSTRATIONS.

DESCRIPTION OF A NEW FOSSIL SEA COW FROM FLORIDA, METAXYTHERIUM FLORIDANUM.

By Oliver P. Hay. Facing page.

1. *Metaxytherium floridanum*, new species ........................................ 4

NOTES ON CYNIPID WASPS, WITH DESCRIPTIONS OF NEW NORTH AMERICAN SPECIES.

By Lewis H. Weld.

1. *Ibalia maculipennis* Haldeman. Female, male, larvae, pupae ............... 2

NOTES ON AMERICAN GALLFLIES OF THE FAMILY CYNIPIDAE PRODUCING GALLS ON ACORNS, WITH DESCRIPTIONS OF NEW SPECIES.

By Lewis H. Weld.

1–5. Gallflies of the family Cynipidae .................................................. 30

NEW TERMITES FROM HAWAII, CENTRAL AND SOUTH AMERICA, AND THE ANTILLES.

Thomas E. Snyder.

1. New species of *Kalotermes* and *Armigermes* .................................... 32
2. A new *Cryptotermes* with front of pronotum serrate in soldier caste ........ 32
3. Two new striking species of *Constrictotermes* with perconstricted heads 32
4. Wing venation of *Kalotermitidae* .................................................. 32
5. Wing venation of *Kalotermitidae* and *Termitidae* .............................. 32

STUDIES ON THE CYCLOSTOMATOUS BRYOZOA.

By Ferdinand Canu and Ray S. Bassler.

1–28. Fossil and recent Cyclostomatous Bryozoa ..................................... 154

DESCRIPTIONS OF MISCELLANEOUS NEW REARED PARASITIC HYMENOPTERA.

By A. B. Gahan.

1. New reared parasitic hymenoptera .................................................. 24

TEXT FIGURES.

A REVISION OF THE CHALCID-FLIES OF THE ENCYRTID GENUS CHRYSPOLYTCERUS.

By P. H. Timberlake.

1. Antenna of female of *Chrysoplatycerus ferrisi* Timberlake .................. 6
2. Antenna of male *Chrysoplatycerus ferrisi* Timberlake ........................ 9

STUDIES ON CHALCID-FLIES OF THE SUBFAMILY LEUCOSPIDINAE, WITH DESCRIPTIONS OF NEW SPECIES.

By Clara Jamieson Weld.

1. Diagrams of pronotum of *Leucospis*, a, *cayennensis*, without any carina; b, *affinis*, with one carina; c *guzeratensis*, with two carinae ............................... 5
2. Diagrams of scutellum, metanotum, and propodeum of *Leucospis*, viewed from above and in profile. a and b, L. *metallica*; c and d, L. *robertsoni*; e and f, *gigas*; g and h, *affinis* ................................................ 6

20107–22—Proc. N. M. vol. 61—11
LIST OF ILLUSTRATIONS.

A NEW GENUS OF TREMATODES FROM THE WHITE BASS.

By H. J. Van Cleave.

1. Series of outline drawings, all to same scale showing relative size and body form of individuals of *Allacanthochasmus varius*. Relative position of acetabulum and two testes shown in each drawing. .......................... 3

2. Details of structure of *Allacanthochasmus varius*. The uterus is completely filled with eggs, but for convenience in this drawing is shown in flat stippling. Vitellaria of dorsal intercelar region have been omitted, as have also the cuticular spines. The scale accompanying the drawing has the relative value of 0.1 mm. ........................................ 4

ANTS FROM HONDURAS AND GUATEMALA.

By William M. Mann.

4. *Belonopelta* (Belonopelta) *deletrix*, new species. Head of worker. ... 10

8. *Leptogenys* (Lobopelta) *imperatrix*, new species. Worker. *a*, thorax and petiole; *b*, head; *c*, petiole from above. .......................... 16

10. *Stenamma felix*, new species. Worker. *a*, head; *b*, thorax and abdomen. 22

11. *Aphaenogaster* (Demomyrmex) *honduriana*, new species. Worker. .... 24

15. *Rogeria inermis*, new species. .................................................. 32

17. *Strumigenys* (Strumigenys) *ludia*, new species. Head of worker. ........ 36

18. *Strumigenys* (Strumigenys) *emeryi*. Head of worker. ..................... 37

19. *Rhopalothrix* (Rhopalothrix) *gravis*, new species. Worker. *a*, head; *b*, thorax and petiole. (Only the larger hairs are shown) .................... 40

22. *Apterostigma abdita*. Thorax and petiole of worker. ....................... 50

DESCRIPTION OF THE SKULL OF *MEGAPTERA MIOCENA*, A FOSSIL HUMPHACK WHALE FROM THE MIocene DIATOMACEOUS EARTH OF LOMPOC, CALIFORNIA.

By Remington Kellogg.

1. Dorsal view of right periotic of *Megaptera miocena* × 1, Cat. No. 10300, U.S. N. M.; Lompoc, California. ............................................. 10

2. Posterior view of left periotic of *Megaptera nodosa* × 1, Cat. No. 21492, U.S. N. M.; Cape Cod, Mass. ............................................. 11
