the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million.

There are a number of reasons for this. First, the world population has increased from 5 billion in 1985 to 6 billion in 2000. Second, the number of people who are undernourished has increased from 15% of the world population in 1985 to 13% in 2000. Third, the number of people who are undernourished has increased from 600 million in 1985 to 800 million in 2000. Fourth, the number of people who are undernourished has increased from 15% of the world population in 1985 to 13% in 2000. Fifth, the number of people who are undernourished has increased from 600 million in 1985 to 800 million in 2000.

MEMORIES IN MELODY

the 1990s, the number of people in the world who are illiterate has increased from 700 million to 800 million. The number of illiterate people in the world is expected to reach 900 million by the year 2015 (UNESCO, 2003).

Illiteracy is a global problem. It is a major barrier to economic and social development. It is a major cause of poverty and social exclusion. It is a major cause of ill health and poor living conditions. It is a major cause of unemployment and underemployment. It is a major cause of social and economic inequality. It is a major cause of social and economic stagnation.
