THE following Report contains an account of the Proceedings of the Fourth Entomological Meeting, held at Pusa from 7th to 12th February 1921 and attended by over forty entomological workers from India and Ceylon.

Fifty-one papers on various aspects of Indian Entomology were read at the Meeting and of these fifty are included in this Report; the other not having been received for publication. The account of the discussion on the papers read at the meeting has been prepared from notes made by the Joint Secretaries, Messrs. R. Senior-White and G. R. Dutt.

That these Meetings are of very real utility and interest to all Entomological workers in India is best shown by the internal evidence of the Reports of the various Meetings which may be left to speak for themselves.

It may be added that no Report was published of the First Entomological Meeting, held in 1915, but that Reports of the Second (1917) and Third (1919) Meetings are still available.
