THE CARE AND FEEDING OF CHILDREN
THE CARE AND FEEDING OF CHILDREN

A CATECHISM FOR THE USE OF MOTHERS AND CHILDREN'S NURSES

BY

L. EMMETT HOLT, M.D., LL.D.

PROFESSOR OF DISEASES OF CHILDREN IN THE COLLEGE OF PHYSICIANS AND SURGEONS (COLUMBIA UNIVERSITY)
ATTENDING PHYSICIAN TO THE BABIES' HOSPITAL AND THE FOUNDLING HOSPITAL, NEW YORK

Sixth Edition, Revised and Enlarged

NEW YORK AND LONDON
D. APPLETON AND COMPANY

1912
PREFACE TO THE SIXTH EDITION

The constant use of the Catechism as a manual for nursery maids has shown the need of fuller treatment of several subjects than was given in the earlier editions. An attempt has been made to meet the needs of mothers and nurses outside of institutions who have made the book a nursery guide, especially in matters relating to older children.

The author's aim has been not to alarm the mother by acquainting her with all the possible diseases and accidents which may befall her child, but to open her eyes to matters which are her direct and chief concern.

It is, therefore, the needs of the well child, not the sick one, which have been considered. The well child must, in most cases, be left to the care of the mother or nurse for whose guidance and assistance these pages are intended. For directions in matters of illness, however, no mother or nurse should de-
pend upon any manual, but upon the advice of a physician.

It is hoped that the mothers and nurses who have found the earlier editions of the Catechism helpful in the solution of some of their nursery problems will find even greater assistance from the present volume.
